

## Crocodile Chemistry

[Windows CD-ROM [Mac OS X available early 2005]; for grades 9-12]

A virtual chemistry lab with 100 chemicals, where students can recreate reactions safely and easily.

Model reactions as you wish, choosing chemicals, concentrations and masses. See equations, physical and chemical data, and plot graphs from your reactions.

Move apparatus and chemicals freely with the mouse, or click on a vessel to investigate its properties. 3D animations show a range of structures, physical processes and reactions.

"A very interesting and stimulating program."

## Crocodilia: online support

[Online support portal for Crocodile Physics/Chemistry/Technology users]

An online support service for users of Crocodile Physics, Chemistry or Technology. Each Crocodilia pack offers the latest upgrade, and also 1 years' access to

- **Home-Use versions** for all your students
- Downloadable **upgrades**
- Growing library of **activities** for class use or for students at home

Upgrades from Crocodilia are yours to keep, whether or not you buy again the next year. Other services are only available while your 1-year Pack is active.

Crocodilia for Crocodile Physics, Chemistry OR Technology		
1-year support pack:	1-599 students in school.....	\$240
	600-1199 students in school.....	\$345
	1200+ students in school.....	\$450
